

# Jeffrey Gutierrez

Senior Software Engineer

## Personal Info

### Phone

(+63) 9204613250

### Email

jeffrey-gutierrez@hotmail.com

### Address

Mabalacat City Pampanga Philippines 2010

## Education

2008-2004

**Information Technology, Bachelor**

AMA Computer University, Philippines

2003

**Computer Technician**

**Vocational/Technical Course**

Mobile Power Technical Training Center Co.

## Expertise

- Blockchain Development
- Node JS
- Typescript
- Angular
- Frontend Development
- React JS
- Snowflake
- HyperLedger Fabric
- Javascript
- PostgreSQL
- HTML & CSS
- My SQL
- Lotus Notes
- Go Lang
- Strong analytical skills
- Smart contracts
- Web Development

## Language

English

Filipino

Performance-driven, resourceful and dedicated Senior Software Engineer with 15 years of experience in Software Development. Technically strong in Web development (Full Stack) and extensive knowledge in Blockchain development, Go Lang, Hyperledger Fabric, Hyperledger Composer, Ethereum, Bitshares, Smart contracts and data structures. I've built projects and applications for Multinational companies and write quality documentation, user manual and technical specifications. Skilled in Development Management, Project Management, Database Management, Product Management, and Team Leadership. Proficient in thorough testing, debugging and software design patterns.

## Experience

### Associate Manager (Application Development)

**December 12, 2022 - Present**

Accenture, Inc. | Mandaluyong, Manila Philippines

- Lead and manage a team of developers to deliver high-quality projects on time.
- Troubleshooting software defects and tuning performance.
- Lead and performed the application development, code reviews, analyze client needs, develop solutions and system specifications.
- Collaborated with project managers and team members to gather and interpret user/system requirements into design specifications and to deliver efficient solutions, advised clients and provided expertise.
- Contributed to each project delivery phase (analysis, development, test, ops).
- Created operational documentation for applications.
- Provide primary support for installation of application releases into production.

### Full Stack Developer

**August 25, 2021 - December 11, 2022**

Collabera Technologies Private Limited, Inc. | Makati City Philippines

- Developed web pages using client-side scripts JavaScript and JQuery for functionality in the flight online booking to the leading airline in the Philippines improving the quality and design of online booking system.
- Provide primary support for installation of application releases into production.
- Performed requirements analysis, design, development and test management.
- Conducted thorough testing and debugging to ensure optimal functionality and user experience, reducing the number of reported bugs to 50%.
- Collaborated with the team for new application features to ensure seamless integration with the existing design and functionality.

### Chief Technology Officer

**October 2020 - June 2021**

BWallet Philippines Inc | Clark Freeport, Pampanga Philippines

- Managing Blockchain Project and work closely with the team in developing these projects.
- Experienced with programming for tokens/ coins, smart contracts.
- Designing, Developing, Maintaining and Testing Web Application using Blockchain Technology (Ethereum), NodeJS and Angular.
- Technical support/ Production Support.
- Collaborated with cross-functional teams to identify and resolve technical issues.

### Blockchain Project Manager

**November 11, 2019 - August 27, 2020**

Clark Outsourcing | Clark Freeport, Pampanga Philippines

- Developed a web application in the Hyperledger Fabric as a blockchain database for the system and Integrating several API's that is needed on the System functionality.
- Collaborated with cross-functional teams to design and implement complex Blockchain-based application and REST API's resulting in a more streamlined and efficient development process.
- Created Solution Detailed Design Documents.

### Software Engineer

**Jan 2019 - Nov 2019**

Quantum Crowd, Inc | Clark Freeport, Pampanga Philippines

- Working closely with the Client in Proposing the Technology, Data Gathering and providing technical solution for the system.
- Lead the development of the Gold Gram Coin System using Blockchain technology.
- Technical support/ Production Support.
- Debugging and resolving application problems.
- Communicated with clients to identify their needs and goals, and developed the application plans.

## **Software Engineer**

**April 15, 2018 - January 8, 2019**

Mercantile Venture Partners Asia Pacific, Inc. | Clark Freeport, Pampanga Philippines

- Lead, design, and develop a web application capable of retrieving User Account Balance, transferring Ethereum (ETH), and handling any deployed tokens on the Ethereum Platform.
- Design, develop, maintain, and test Web Applications using Blockchain Technology (specifically Ethereum), NodeJS, and Angular.
- Conduct the software design process, ensuring the application aligns with established standards and requirements.
- Perform professional application tests to guarantee the reliability and functionality of the developed software.
- Work closely with clients to propose technology solutions.
- Gather data and provide technical solutions for system requirements.
- Collaborate effectively with team members to ensure seamless integration of various components.
- Maintain comprehensive documentation for all developed software, ensuring clarity and ease of understanding for future reference.

## **Application Developer**

**November 17, 2014 - April 6, 2018**

IBM Solutions Delivery, Inc | Quezon City Philippines

- Developed Five (5) Web Application Projects using Blockchain Technology (Ethereum), Hyperledger Fabric, Hyperledger Composer, NodeJS, Jade (HTML), Bootstrap(CSS), Javascript, Angular and Go Lang.
- Participated in the whole software development process from design to implementation and delivery.
- Designing, Developing, Maintaining, Deploying and Testing Applications using Lotus Notes Designer.
- Technical support/ Production Support.
- Debugging and resolving application problems.
- Contributed in application enhancements / modification.

## **IT Application Programmer**

**November 28, 2011 - October 31, 2014**

Dai-Chi Management Pte Ltd | Singapore

- Manage Programming, Designing, Developing, Modification, Implementation, Maintenance and Testing of the applications.
- Work closely with the team and on ad-hoc projects.
- Manage a customer project and assigned tasks without closed supervisor's instruction.
- Conduct user requirement sessions with clients and manage clients project and assigned tasks.
- Gathering Application Scope and Documentation.
- Development using Visual Basic.Net, Text File and MS Access, MS SQL.
- Own Schedule Management and Project Management
- Onsite and offsite User support trouble shooting including Malaysia and Overseas.

## **Junior Assistant Manager 1 (Assigned in Information Technology /IT Operations/Windows Applications/Lotus Notes)**

**May 17, 2010 - December 10, 2011**

Banco De Oro Unibank | Makati City Philippines

- Monitoring, Troubleshoot user programs regarding Lotus Notes Clients and Applications.
- Installation of patches for windows operating system on windows servers.
- Installing, Maintaining and Upgrading of servers Operating System.
- Developed internal applications using Lotus Notes Designer that improves the process of user application request's speed and performance within the departments.
- Managing user account in Lotus Domino Directory and managing mails of users Lotus Mail Database.
- Installing Blackberry Enterprise Server version 5 which using Lotus Domino.
- Transporting/Migrating Blackberry Users from version 4 to 5.
- Implementing/Configuring Distributed File System.
- Installing/Implementing/Configuring Hyper-V, DNS, DHCP and Active Directory.

## **Lotus Notes Consultant**

**February 20, 2008 - May 16, 2010**

Softweb Consulting, Inc | Makati City Philippines

- Meet clients need for the application by creating scripts, applets or programs.
- Coding, Coordination of work between team members and testing.
- Gathering Application Scope and Documentation.
- Testing, Implementation and Maintenance of the applications.
- Developed several applications for Government and private agencies using Lotus Notes, Lotus Script, Java Script.
- Provided technical support/ production support.
- Contributed and collaborated with team members for application Technical / User Manual.
